Silicon temperature sensors**KTY85-1 series****DESCRIPTION**

The temperature sensors in the KTY85-1 series have a positive temperature coefficient of resistance and are suitable for use in measurement and control systems. The sensors are encapsulated in the SOD80 glass SMD package.

Tolerances of 0.5% or other special selections are available on request.

MARKING

TYPE NUMBER	MARKING BAND COLOUR
KTY85-110	yellow
KTY85-120	red
KTY85-121	white
KTY85-122	green
KTY85-150	grey
KTY85-151	black
KTY85-152	blue

The coloured marking band indicates the negative connection and the product type.

The sensor must be operated with the lower potential at the marked connection.

Notes

1. The thermal time constant is the time taken for the sensor to reach 63.2% of the total temperature difference.
For example, if a sensor with a temperature of 25°C is moved to an environment with an ambient temperature of 100°C , the time for the sensor to reach a temperature of 72.4°C is the thermal time constant.
2. Inert liquid, e.g. FC43 manufactured by the 3M company.

Data Sheet Status	
Objective specification	This data sheet contains target or goal specifications for product development.
Preliminary specification	This data sheet contains preliminary data; supplementary data may be published later.
Product specification	This data sheet contains final product specifications.
Limiting values	
Limiting values given are in accordance with the Absolute Maximum Rating System (IEC 134). Stress above one or more of the limiting values may cause permanent damage to the device. These are stress ratings only and operation of the device at these or at any other conditions above those given in the Characteristics sections of the specification is not implied. Exposure to limiting values for extended periods may affect device reliability.	
Application information	
Where application information is given, it is advisory and does not form part of the specification.	

LIFE SUPPORT APPLICATIONS

These products are not designed for use in life support appliances, devices, or systems where malfunction of these products can reasonably be expected to result in personal injury. Philips customers using or selling these products for use in such applications do so at their own risk and agree to fully indemnify Philips for any damages resulting from such improper use or sale.
