

Inductors

For General Applications

SMD

MLF Series MLF2012 Type

FEATURES

- High-reliability monolithic structure.
- Ferrite core and magnetic shielding enables the design of compact circuits with high packing density.
- Excellent solderability and high heat resistance permits either flow or reflow soldering.

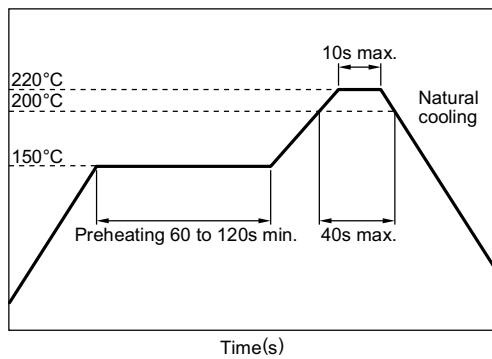

APPLICATIONS

Personal computers, HDDs, or other various electronic appliances.

SPECIFICATIONS

Operating temperature range	-25 to +85°C
Storage temperature range	-40 to +85°C [Unit of products]

RECOMMENDED REFLOW SOLDERING CONDITIONS

PRODUCT IDENTIFICATION

MLF 1608 A 1R0 K T
(1) (2) (3) (4) (5) (6)

(1) Series name

(2) Dimensions L×W

1608	1.6×0.8mm
2012	2.0×1.25mm

(3) Material code

(4) Inductance value

47N	47nH[0.047μH]
R15	0.15μH
1R0	1μH
100	10μH

(5) Inductance tolerance

K	±10%
M	±20%

(6) Packaging style

T	Taping [reel]
---	---------------

PACKAGING STYLE AND QUANTITIES

Packaging style	Product's thickness	Quantity
Taping	0.8/0.85mm	4000 pieces/reel
	1.25mm	2000 pieces/reel

HANDLING AND PRECAUTIONS

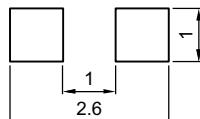

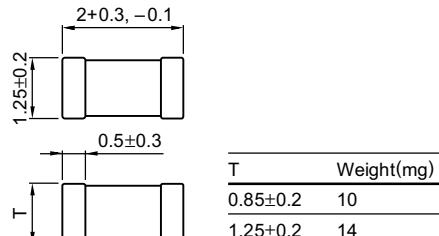

- Before soldering, be sure to preheat components. The preheating temperature should be set so that the temperature difference between the solder temperature and product temperature does not exceed 150°C.
- After mounting components onto the printed circuit board, do not apply stress through board bending or mishandling.
- The inductance value may change due to magnetic saturation if the current exceeds the rated maximum.
- Do not expose the inductors to stray magnetic fields.
- Avoid static electricity discharge during handling.
- When hand soldering, apply the soldering iron to the printed circuit board only. Temperature of the iron tip should not exceed 300°C. Soldering time should not exceed 3 seconds.
